2 IN 1 MOISTURISING BUTTER SCRUB

Your daily recipe for nourished skin - the express way!

Ingredients

Shea Butter

A natural fat extracted from fruit of the Shea Tree & used as a moisturiser & emollient.

Cocoa Butter

With its smooth texture & sweet fragrance, Cocoa Butter is an essential ingredient for nourished skin.

Mowrah Butter

Reduces degeneration of skin cells and restores skin flexibility.

Kokum Butter

Prevents drying of the skin and development of lines.

Vitamin E

A naturally powerful antioxidant which protects against damaging environmental elements.

Sweet Almond Oil

Sweet Almond is especially good for dry, sensitive & irritated skin because of its softening & nourishing properties.

Sugar &

Olive Pit granules
Great for eliminating dead cells by exfoliation, exposing a new layer of brighter, rehydrated skin.

Time

5 minutes

Shower Temperature

Warm - hot

Turn your every-day shower into a whole new experience with this incredible new luxurious 2 in 1 body scrub that combines the power of exfoliation plus moisturisation, which will last long after your shower!

At the luxurious ladies only day spa in Covent Garden, women often complain that their lifestyles are too hectic to take time to pamper their skin as much as they would like. The Sanctuary - 'body scrub' experts - have therefore launched this amazing new 2 in 1 Moisturising Butter Scrub designed not only to save time - but to give you the best exfoliation available in a tube, leaving skin moisturised and nourished.

The 2 in 1 Moisturising Butter Scrub contains a delicious rich quartet of nut butters - Shea and Cocoa known for their protective properties & Mowrah & Kokum, both rich in fatty acids including Omega 9 & 10. These are combined with Sweet Almond Oil which helps to lock in moisture and make skin soft and supple. Additional Vitamin E, a protective anti-oxidant is included and the scrubbing properties are provided by both fine natural sugar; and Olive Pit granules which instantly slough away and help remove dead, lifeless skin cells.

The result?

Skin is left feeling velvety soft, smooth to the touch and radiant, with no need to follow up with body creams or lotions.

Expert tip from Jacqueline Burchell, Product Director

"This product works best when applied to dry skin, working in circular movements. This will give you the most effective exfoliation, then you're ready to shower it off. The combination of both exfoliation granules helps rid dead skin cells from the body, allowing deeper penetration of the nut butters."

Directions

Use daily on damp or dry skin. Rub into the skin using small circular motions before rinsing off in the shower.
